PRIMARY EXAMINER

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 11-15 are allowable over the prior art of record because the prior art of record does not teach a method of manufacturing an information recording medium including a substrate and a recording layer disposed above the substrate, the method comprising forming the recording layer by a vapor deposition method wherein the recording layer is formed of a material expressed by a composition formula of $[(\text{Ge}, \text{Sn})_A \text{Sb}_2 \text{Te}_{3+A}]_{100-B} \text{M}_B$, where $0 < A \leq 10$, $0 < B \leq 20$, such that A and B each represent an atomic percent and M is at least one of Ag, Al, Cr, Mn or N wherein the recording layer is transformed in phase reversibly between a crystal phase and an amorphous phase by an irradiation of an energy beam.

The closest prior art of record to deNeufville et al. (U.S. Pat. 4,621,032) fails to teach Applicant's claimed deposited composition layer and fails to point in any direction to achieve Applicant's deposited composition layer in order to achieve preventing the deterioration of the repeated-rewriting performance of the information recording medium or preventing the deterioration in crystallization sensitivity from worsening with time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
